The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/711,088	Applicant(s) SABELSTROM ET AL.	
	Examiner MARIANO SY	Art Unit 3657	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 December 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 1, 2008 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3657

4. Claims 1-6, 10, 12-21, and 23-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barger (US 6,155,650) in view of Yanagi (JP 59-47531A).

Barger disclosed, as shown in fig. 1-4, a protection device 10 for protecting a brake disk 24 in a disk brake from dirt particles, the brake disk having a pair of side surfaces and a radially outwardly facing edge surface disposed between the side surfaces, said protection device comprising: at least one protection means 56 configured to cover at least partly the edge surface of the brake disk for effectively preventing dirt particles and on-coming, travel generated wind from directly striking the brake disk.

However Barger failed to disclose wherein the at least one protection means is constructed from material that is shape-influenced by heat.

Yanagi teaches, as shown in fig. 7, the use of protection means 11 that is L-shaped and is influenced by heat.

It would have been obvious to one of ordinary skill in the art to merely use the known L-shaped protections means that is influenced by heat into the device of Barger, as taught by Yanagi, in order to restrict the opening of the protection means and only open when the temperature is high and needed for cooling so as to minimize dirt particles from brake disk.

Allowable Subject Matter

5. Claims 11 and 22 are allowed.

Response to Arguments

6. Applicant's arguments with respect to claims 1, 15, and 25 have been considered but are moot in view of the new ground(s) of rejection.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mariano Sy whose telephone number is 571-272-7126. The examiner can normally be reached on Mon.-Fri. from 8:30 A.M. to 2:30 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Siconolfi, can be reached on 571-272-7124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
